AQUA SCIENCE

CONTRACT MANUFACTURING SERVICES

Aqua Science has a team of highly skilled scientists, production specialists, and logistics staff ready to assist you in meeting your company's biotech manufacturing needs and requirements at a competitive cost whether your company needs a contract manufacturer for solutions, reagents, or other analytical products, Aqua Science facilitates the process of manufacturing, assembly, and shipping globally to get your product out to the market.

R&D

Our team has extensive expertise in Research and Development of diagnostic kits and reagents, involving but not limited to Immunoassay test methods such as lateral flow, ELISA, magnetic particle, and latex. In the Microbiology field, we offer a range of bacteria production and packaging. **Aqua Science can assist with converting your vision into a reality**.

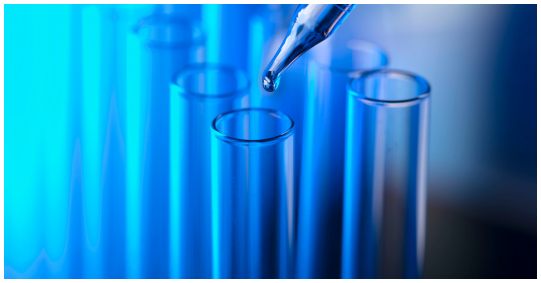

Lyophilization Services

Hiring Aqua Science will provide not just many years of experience with our team but also the newest, state of the art and high volume equipment. Some of our Lyophilization Services are:

- Cycle development - matrix optimization, cycle evaluation, troubleshooting
- Existing method execution – aseptic and non-aseptic fill, bulk lyophilization, capping, labeling, storage
- Leased time services.

Custom Reagent & Kit Manufacture

Aqua Science can help from one step to managing a complete production process. We offer assistance with procurement, IQ, assembly, labeling, packaging, OQ, and shipping services.

Product Assembly

Our team is always pursuing the best solutions for our clients from the basic to the complex when it comes to part assembly, labeling, aseptic and non-aseptic fill, capping/crimping, and sterilization. **Aqua Science has the experience and knowledge to achieve your goal.**
